Global health care systems have become overwhelmed with potentially infectious patients seeking testing and care. Preventing the spread of infection to and from health care workers and patients relies on effective use of personal protective equipment (PPE) gloves, face masks, air-purifying respirators, goggles, face shields, respirators, and gowns. PPE shortages are currently posing a tremendous challenge to the US healthcare system because of the COVID-19 pandemic. Healthcare facilities are having difficulty accessing the needed PPE.

We Care LLC can provide quality products to make up the needs by a partner of 3M Asia manufacture, Best care both in USA and Asia.
